

DIMMER COMPATIBILITY

Primelite's LED lamps were tested for compatibility with the below listed dimmers. The below compatibility chart can be used for guidance when selecting a dimmer and LED lamp combination. Dimmers that do not appear on the chart may be compatible but have not been tested. Criteria includes level of dimmability and amount dimmer limits LED efficacy at dimmer's 100% setting.

All testing has been performed with a stable main supply. The quality of the existing installation and wiring may affect dimming performance. Since no assurance can be provided regarding these factors, it is a general recommendation to perform a test on site prior to installing LED lamps.

Dimmer Manufacturer & Model #	LED 12	LED 22
